

K22L5007000**K22L5007000**

K22 is a mechanical thermostat containing a relay unipolaire SPDT whose reverser the contact opens in the increase of temperature.

- Weak dimensions
- no adjustable or fixed deposit
- weak or important Difference according to regulation of factory
- standard electric Contacts or in strong power of cut
- electric Connections by the back
- standard Assembly by central stalk
- Capillary from 30 to 250 cms

Technical data:

- Connections Faston 6,3 mm
- to Be able to of standard cut: 6A in 250V, strengthened: 16A in 250V
