

J10-07001000

Hygrostat J10-07001000

J10 is hygostats dedicated to the regulation of humidifiers and deshumidificateurs.

They exist in slot-in or wall version.

The point of order settles by means of a button of rotary regulation.

The fixed difference is about 4 % of relative humidity.

Relays are of type SPST or SPDT.

TECHNICAL DATA:

- adjustable relative Humidity from 20 to 80 %.
- Difference about 4 % HR.
- Limit to pods 6,3x0,8 mm.
- Limit 1: contact opened to the increase, the border 2: common, limit 3: contact opened to the decline.
- Manufacturing according to standards
 - IEC60730-1 and 2-13,
 - UL873,
 - C22.2 CSA.
- Number of cycles:
 - 60000 automatic switchings in 60°C,
 - 6000 manipulations of buttons.
- limit Conditions of use: 0 in 60°C
- limit Conditions of storage: 30 in 65,5°C.
- Protection factor: IP00.
- Protection classifies 1 against the electric shocks.
- Fixation by saw
