

T24L6002W00

Defrost timer T24L6002W00

The T24 series are defrost clocks for which the end of the defrost cycle after a time set by factory or after reaching the end temperature defrost detected by the probe.

Series T24-100: At the beginning of the icing, the contact resistance 2-3 activating defrost close contact while running the 3-4 compressor opens. The end of the icing occurs after flow time or after reaching the end temperature and defrost simultaneously defrosting power is switched off and the compressor engaged.

Series T24-3000: Ditto 100 series, electric defrosting is cut after passage of time or after reaching the end temperature defrosting against by the compressor will only re-started at the end of time to defrost.

Series T24-6000: Ditto 3000 series but this model is equipped with an auxiliary relay output delayed compared to the compressor fan delay.

TECHNICAL DATA:

- Contacts: Faston 6.3 mm x 0.8 mm
- Power: 240V/50Hz
- Switching capacity of contacts:
 - Terminals 2-3: 8 (1) A 240V, - Terminals 3-4: 6 (6) A 240V, - Terminals 3-5: 1 (1) A 240V.
