

KLR-E517 7810

Thermostat KLR-E517 7810

Series KLR-E is characterized by its classic design and high accuracy.

Regulators are robust, reliable and long life. A clear display and a friendly command are other benefits.

They are mainly used with installations at two and four tubes in offices and residential buildings, heat pumps and air conditioning systems.

Many models to meet the most diverse.

Technical data:

Tension of functioning of thermostat : AC/DC 24 V 50/60Hz

Tension functioning to ventilate: AC 24 240 V/50/60Hz

Current of switching: Ventilate 6A cosφ = 1/3A
cosφ = 0,6

Load max. 3mA: Chauff. 24 V AC / DC / 24V 3 (2) In

Range of temperature: 5...30°C

Proportional band : 1,5 K

Detector of temperature: Internal resistance CTN

Neutral zone : 0,5...7,5 K (Adjustable)

Class of protection of the case : IP 30/Isolated

Remote probe : F 193 720
