

KLR-E52558

Thermostat KLR-E52558

Series KLR-E is characterized by its classic design and high accuracy.

Regulators are robust, reliable and long life. A clear display and a friendly command are other benefits.

They are mainly used with installations at two and four tubes in offices and residential buildings, heat pumps and air conditioning systems.

Many models to meet the most diverse.

Technical data:

Tension of functioning : AC 24V/50/60Hz

Current of switching: 10 A cos ϕ = 1 / 4A cos ϕ ;
= 0,6

Contact: tipping over

Range of temperature: 5...30°C

Hystérésis : ~0,5 K

Neutral zone : ~0,5...8,5 K

Detector of temperature: Internal resistance CTN

Class of protection of the case : IP 30/Isolated

Probe of condensation: TS 193 683 (10 m of cable in PVC)

N° of ref. Suit: 000 193 683 000
