

Fasec 33

Speed variator

The FASEC 33 is a speed controller for a single-phase condensing fan. As the temperature increases, the speed increases. It has 1 input for PTC probe and a Triac output for the management of loads up to 2.5 A (500W). The set point can be set from 0 to 60 ° C. The format is 48x96 and the power supply is 230Vac. The Fasec 337 is for single-phase fans up to 7A (1000W).
