

Fasec 43

Speed variator

The FASEC 43 is a speed controller for single-phase evaporator fan. The lower the temperature, the faster the speed increases. It has 1 input for PTC probe and a Triac output for the management of loads up to 2.5 A (500W). The set point can be set from -40 to 30 ° C. The format is 48x96 and the power supply is 230Vac.
