

Memo 200

Memo 200 temperature / humidity recording system

The MEMO 200 is a temperature / humidity recorder for cold rooms, able to monitor two zones of temperature and a humidity zone. In accordance with UNI EN 12830, the MEMO 200 easily attaches to a wall thanks to the screws provided. Translated into 7 languages, it is easily customizable. A USB port is also available to transfer all data to a USB key. This data can be exploited via the WinRecorder Store software provided. Software link for data recovery: [WinRecord Memo 200](#)
