

FREE ECRAN TACTILE 3.5

FREE TOUCH SCREEN 3.5

Eliwell France touch screens are equipped with a high-performance internal microprocessor for a colorful graphic display and internal storage memory. Thanks to these touch screens, you can display, modify variables or parameters, configure alarms. These screens have standard serial ports for connectivity with Eliwell France programmable controllers ([Programmable PLC range](#).) or other regulators. The programming software is completely free and available on our website at [clicking here](#).

Microprocessor
