

D16P30A01MS20 **D16P30A01MS200**

The D16P are electromechanical pressure switches for high and low pressure. They are equipped with an SPDT switch that opens and closes when the pressure increases or decreases.

Technical Data

Usage temperature	-40....55 °C
Storage temperature	-40....70 °C
Contact type	SPDT
Application	High pressure
Reset	Automatic
Mechanical fitting	Male 7/16-20UNF
Pressure range (BAR)	7...31 (100...450)
Differential (BAR)	adjustable 2,0...8,0 (35...115)
