0

The D16T are pressure switches designed for temperature. They are equipped with an SPDT switch that opens and closes when the temperature rises or falls.

Technical Data

| | |
|----------------------------|--------------|
| Usage temperature | -40....55 °C |
| Storage temperature | -40....70 °C |
| Temperature range | -10...+25°C |
| Contact type | SPDT |
| Reset | Automatic |
| Differential (BAR) | adjustable |
| Sensing element | coiled end |
| Overall length | 2 mt |
