EW TRANSTEL NEXT

EW TRANSTEL NEXT is a new generation alarm transmitter, it allows via the GSM network (SIM card not supplied) to transmit any type of alarm by voice message; SMS or to a monitoring center. It has an On/Off input with 8 inputs and 4 outputs. Programming entirely guided by voice assistance or an integrated Web-server makes it the easiest product to install in its category and the most complete.

EW TRANSTEL NEXT is a new generation alarm transmitter, it allows via the GSM network (SIM card not supplied) to transmit any type of alarm by voice message; SMS or to a monitoring center. It has an On/Off input with 8 inputs and 4 outputs.

Programming entirely guided by voice assistance or an integrated Web-server makes it the easiest product to install in its category and the most complete. Overriding the SIM card PIN code is done directly on the product (keyboard or Web-server) A 12V 2Ah lead-acid battery (not supplied) ensures an operating autonomy of several hours in the event of a power cut. All events are saved in a non-volatile memory of more than 50,000 events. Outputs configurable as remote control can be activated remotely by SMS; recognition of the calling number or voice server. A periodic cyclical test ensures its proper functioning and its connectivity with the GSM network.

TRANSTEL

Supply	230V
Number of entries	8
Number of outputs	4
On/Off input	1
Microphone input	1
transmission type	GSM VOICE/ SMS
Transmission for	cyclic test/ mains fault/ low battery
Programming	Voice assistance or Web server
Telephone numbers for voice transmission	32
Telephone numbers for SMS transmission	32
Event memory	Integrated
